ARKON, C.A

STRATEGIC SOLUTIONS SERVING THE OIL & GAS INDUSTRY.

WHO WE ARE

ARKON, C.A is a specialized company dedicated to developing integrated solutions for the energy sector. With extensive experience and highly skilled personnel, we provide strategic support to the Oil & Gas industry, executing drilling, workover, and well service activities. Our expertise includes construction, repair, maintenance, and installation within Refining and Crude Oil Processing, as well as the Civil, Mechanical, Electrical, and Instrumentation disciplines.

This strategic adaptability and result-oriented management are backed by a highly qualified multidisciplinary team. In demanding operating environments, we ensure our clients' operational continuity through the integration of cutting-edge technologies, equipment logistics, and an unwavering commitment to operational excellence.

Our management is founded on integrity, transparency, and strict compliance with international quality standards (ISO 9001), as well as current health, safety, and environmental (HSE) regulations, ensuring optimal and sustainable solutions for the energy industry.

CORPORATE BACKGROUND

Since its founding in 2015, ARKON, C.A has built a solid track record based on the successful execution of projects and the delivery of high-level solutions. Our corporate evolution is backed by a team of specialists providing technical support and precision engineering, guaranteeing results that exceed our clients' expectations under the strictest criteria of excellence and operational quality.

MANAGEMENT PHILOSOPHY

Mission:

To drive our clients' industrial development through highly qualified personnel, cutting-edge technology, and logistics. We are committed to executing every project with efficacy, efficiency, and responsibility, guaranteeing 100% reliable solutions that maximize productivity and ensure operational continuity, under strict compliance with safety and environmental protection standards.

Vision:

To consolidate our position as a leading national and international reference in the provision of oilfield and construction services, recognized for our operational excellence and capacity for innovation. We aim for global projection through sustained growth and high technical availability, positioning ourselves as the preferred strategic partner due to our integrity, transparency, and commitment to creating long-term value.

GOALS

To consolidate ARKON, C.A as the leading strategic partner in the provision of integrated Engineering, Procurement, and Construction (EPC) services, guaranteeing high-reliability technical solutions that maximize productivity and ensure the operational continuity of our clients in the Energy, Oil & Gas, and Infrastructure sectors.

This objective is deployed through the following operational guidelines:

Asset Optimization:

To execute drilling, workover, and well maintenance programs through planned schemes that reactivate production potential and mitigate non-productive time (NPT).

Engineering and Construction Excellence:

To develop infrastructure projects in the Civil, Mechanical, Electrical, and Instrumentation disciplines under the strictest international quality standards.

Logistics Efficiency:

To provide procurement and supply solutions of high technical demand, ensuring the availability of critical equipment and materials.

HSEQ Management:

To maintain zero-accident levels and minimal environmental impact, prioritizing the safety of human talent and the preservation of the environment.

CORPORATE VALUES

Quality and Excellence:

It is our way of being and doing. We remain open to innovation and continuous improvement to achieve constant technical advancement.

Integrity and Ethics:

We base our actions on sound corporate conduct and truthfulness. We maintain total transparency and consistency in every project, with honesty in our communications being the pillar that sustains the trust of our strategic partners.

Responsibility and Commitment:

We assume the duty to exceed our clients' expectations by executing every task effectively and within the agreed timelines. We take responsibility for the impact of our decisions and encourage the professional development of our team.

Synergy and Equality:

We believe in shared solutions through teamwork, promoting fairness and equal opportunity.

Sustainability and Environmental Awareness:

We operate by balancing economic success with the preservation of the environment for responsible energy development.

COMPANY POLICIES

1. QUALITY AND INNOVATION POLICY

Our management is founded on compliance with international standards and the pursuit of technical excellence. We are committed to:

- Executing engineering, procurement, and well workover services under criteria of precision and continuous improvement.
- Integrating cutting-edge technologies to optimize the productivity of our clients' assets and mitigate non-productive time (NPT).
- Ensuring that every phase of our operational and administrative processes meets the most demanding technical requirements of the global sector.

2. COMPREHENSIVE SECURITY AND ENVIRONMENTAL

Management Policy The protection of life and ecological balance are pillars of our operational continuity. We consolidate this commitment through:

Operational and Road Safety:

We maintain a zero-accident target. We proactively identify and control risks in the field and on the road, applying defensive driving techniques and preventive fleet maintenance.

Environmental Preservation:

We implement rigorous controls for spill prevention and the technical management of waste (hazardous and non-hazardous), minimizing the impact on soil and water sources.

Emergency Response:

We ensure trained personnel and immediate resources to act in the event of unforeseen circumstances, prioritizing human and environmental integrity.

3. ETHICS, TRANSPARENCY, AND CONFIDENTIALITY POLICY

The trust of our strategic partners is ARKON, C.A's most valuable asset.

We operate under a zero-tolerance policy regarding bribery, fraud, and any practice that compromises sound corporate conduct, responsibility and technically precise tasks.

We guarantee truthfulness and honesty in all our communications and management processes.

We maintain a strict confidentiality protocol to safeguard the technical and strategic data of our clients and partners.

4. SOCIAL RESPONSIBILITY AND HUMAN TALENT POLICY

We are committed to generating a positive impact both internally and externally, based on Synergy and Equality:

Community Relations:

We foster fluid and transparent communication with communities adjacent to our projects, coordinating action plans to minimize operational disturbances and promote mutual respect.

Talent Development:

We encourage the continuous professional growth of our multidisciplinary team, ensuring a fair work environment with equal opportunities and free from discrimination.

Value Creation:

We strive for every project to contribute to the industrial development and well-being of the societies where we operate.

5. PROHIBITED SUBSTANCES PREVENTION POLICY

To guarantee reliable and safe operations, we maintain work environments free from risk factors that may alter professional performance.

The consumption, possession, or distribution of alcohol and illicit substances is strictly prohibited in all our operational and administrative areas.

We conduct periodic physical and mental fitness assessments, ensuring that personnel are in optimal condition to execute high-responsibility and technically precise tasks.

OPERATIONAL CAPACITY AND SERVICE PORTFOLIO

Our operational capacity is based on providing integrated services that range from location access and surveying, to the construction of infrastructure and wells, and the strategic reactivation of Production Units. We execute every intervention under a specifically planned scheme to maximize asset performance and mitigate Non-Productive Time (NPT).

1. Well Services and Production Optimization

- **Well Intervention and Repair:**

Rehabilitation of wells with mechanical damage or low production to reactivate their estimated potential.

- **Wellhead (Christmas Tree) Refurbishment:**

Maintenance and certification of control equipment for all brands.

- **Mechanical and Industrial Pumping:**

Repair and maintenance of Triplex, Duplex, and centrifugal pumps.

- **Pump Truck Supply:**

Specialized support for well and station operations.

2. ENGINEERING, PROCUREMENT, AND CONSTRUCTION (EPC) OF INFRASTRUCTURE

We develop industrial projects ensuring technical precision in every phase.

- **Mechanical Works and Piping:**

Repair and installation of pipelines. Fabrication and installation of spools and industrial assemblies.

- **Tank Maintenance:**

Repair, maintenance, and assembly of bolted and welded tanks.

- **Civil Works:**

Earthmoving, roadworks, industrial buildings, and pier/dock repairs.

- **Electrical and Instrumentation Works:**

Installation of low, medium, and high-voltage lines; control systems and plant turnarounds.

3. ENVIRONMENTAL REMEDiation AND FLUID MANAGEMENT

Operations focused on the elimination of environmental risks and the recovery of liabilities.

- **Comprehensive Pit Remediation:**

Professional dredging, technical confinement, and site restoration for the definitive elimination of environmental risks.

- **Crude Oil Recovery:**

Extraction and recovery of hydrocarbons from pits and spill zones.

- **Chemical and Hydraulic Cleaning:**

Specialized deep-cleaning services for storage tanks and process systems.

- **Fluid Transport:**

Specialized hauling with state-of-the-art vacuum units for water, fuel, and waste.

4. Equipment Supply, Machinery, and Heavy Logistics

Ensuring the availability of critical assets for operational continuity in the field.

- **Drilling Rigs and Structures:**

Supply of drilling and service rigs, masts, crowns, substructures, and spare parts.

- **Mud Handling and Control Equipment:**

Water and mud tanks, shale shakers, degassers, pumps, and valve systems (gate and relief valves).

- **Downhole and Surface Tools:**

Hydraulic casing and tubing tongs, elevators, pneumatic slips, rotary tables, and Kelly drives.

- **Heavy Cargo Transport:**

Logistics and transportation services for heavy machinery and equipment to any location or operational area.

5. Specialized Consulting and Advisory Services

- Technical support in Managed Pressure Drilling (MPD), well testing, and field optimization.
- Project management for the refurbishment and repowering of transport fleets and industrial equipment.

ARKON, C.A

STRATEGIC SOLUTIONS SERVING THE OIL & GAS INDUSTRY.

Comprehensive Tank Maintenance (Bolted and Welded)

At ARKON, C.A, the maintenance and repair of tanks of all capacities is executed under strict compliance with API Standards. We have highly qualified personnel and the necessary equipment to guarantee operational safety and service quality.

Our expertise ranges from degassing and cleaning to disassembly, assembly, painting, and the repair of accessories (ladders, vents, fittings) and cathodic protection systems. By offering an integrated solution, we optimize execution times and reduce operating costs, ensuring project delivery according to established schedules.

EFFLUENT AND PIT REMEDIATION

ARKON, C.A promotes strategic technological alliances to face the industry's environmental challenges. We offer specialized services in the treatment of drilling fluids, produced water, and other industrial liquids. Our process integrates effluent treatment and solids stabilization through the Landfarming method. We provide a complete solution that includes controlled spraying or the transfer of treated fluids and pit remediation, applying methods that allow for site recovery and vegetation regeneration, thus eliminating environmental risks.

CHEMICAL AND HYDRAULIC TANK CLEANING

This service aims to remove sediments accumulated at the bottom of tanks to transform them into usable crude oil. Through the use of a solvent vehicle (diesel) and specific surfactants, we break down heavy particles to reintegrate them as natural crude oil. At ARKON, C.A, we perform this cleaning with specialized equipment and technically trained human resources, ensuring product recovery and an efficient operation in all types of storage tanks.

LOGISTICS AND HEAVY MACHINERY TRANSPORT

We understand that asset mobility is vital to the success of oil operations. ARKON, C.A offers an integrated and efficient logistics service, designed for the secure safeguarding and transfer of heavy equipment between distant locations and operational areas. We have all the technical and human resources to guarantee that the activity is completed on schedule, assuming responsibility for the cargo in every mobilization. Our expert personnel accurately understand the criticality of their work, allowing us to execute successful and safe transport operations.

INSTALLATION AND MAINTENANCE OF PIPING NETWORKS (ABOVEGROUND AND UNDERGROUND)

ARKON, C.A has the operational capacity for the installation of flow lines in any work environment. Our service is oriented toward full client satisfaction through the execution of high-quality works, including the laying of aboveground and underground pipelines, the application of special coatings, and the installation of cathodic protection systems. Every project is executed in rigorous compliance with industrial safety regulations, guaranteeing reliable infrastructure and efficient operation.
